

18th Plant Biology Symposium @UMass Amherst

# Biology of Chloroplasts & Mitochondria

Saturday, October 21, 2023

9am-4 pm, Integrated Science Building

**Maureen Hanson | Cornell University**

Improving Photosynthesis Through Chloroplast Engineering

**Daniel Sloan | Colorado State University**

Mechanisms of Mutation Rate Variation in Plant Mitochondria

**Jeeyon Jeong | Amherst College**

Cellular and Physiological Effects of Chloroplast/Mitochondrial Iron Export

**Krishna Niyogi | University of California, Berkeley**

Understanding and Altering Chloroplast Photoprotection to Improve Crop Productivity

**Maria Maldonado | University of California, Davis**

Structural Insights into Plant Respiration

- **FREE** one-day symposium hosted by UMass Plant Biology
- **FREE lunch included**
- Features 5 keynote speakers and a poster session
- Everyone welcome! Undergraduates, graduate students and post-docs studying any area of plant biology are invited to present a poster (UMass PB students required to present!)

For registration and more information see:  
<https://gpls.cns.umass.edu/pb/symposium>

We are grateful for support  
from PPSystems
