

18th Symposium in Plant Biology Biology of Chloroplasts and Mitochondria October 21, 2023

Program and Attendee List

We are grateful for funding support from PPSystems and the UMass BTP program

btp.umass.edu

<u>Biology of Chloroplasts & Mitochondria - Program</u>

8:30 AM	ISB Atrium	Registration
9:00 AM	ISB Auditorium	Welcome Ana Caicedo, PB Program Leader
9:05 AM	ISB Auditorium	Structural Insights into Plant Respiration MARIA MALDONADO Department of Plant Biology, UC Davis (Introduced by Sibongile Mafu)
9:55 AM		Break
10:10 AM	ISB Auditorium	Mechanisms of Mutation Rate Variation in Plant Mitochondria DANIEL SLOAN Department of Biology, Colorado State University (Introduced by Michelle Facette)
11:00 AM	ISB Auditorium	Understanding and Altering Chloroplast Photoprotection to Improve Crop Productivity KRISHNA NIYOGI Department of Plant and Microbial Biology, UC Berkeley (Introduced by Michelle DaCosta)
12:00 - 2:00 PM	Campus Center, 11th floor	Lunch Poster set-up & poster preview
2:00 PM	11th floor	Poster set-up & poster preview Welcome to afternoon session
2:00 PM 2:10 PM	11th floor ISB Auditorium	Welcome to afternoon session Alice Cheung, Biochemistry and Molecular Biology Cellular and Physiological Effects of Chloroplast/Mitochondrial Iron Export JEEYON JEONG Department of Biology, Amherst College

Please be kind to our planet and bring a reusable water bottle or cup. Water will be provided.

Last name	First name	Affiliation	Lab Supervisor	Poster
1 Abushal	Logayn	UMass Amherst, Plant Biology	Sam Hazen	Role of hormone signaling in the regulation of root cell wall thickening
2 Amundson	Kirk	University of California Davis, Plant Biology	Luca Comai	Meristem layer-specific mutations of a potato periclinal chimera
3 Bagdan	Kaylee	Skidmore College, Biology Department	David Domozych	Examining Chloroplast Structure Under Biotic and Abiotic Stressors in the Green Alga, Penium margaritaceum
4 Boulanger	Shelby	UMass Amherst, Plant Biology	Samuel Hazen	Genetic variation in Brachypodium distachyon influences growth-promoting response to Fusarium oxysporum Fo47
5 Campilan	Joni Rey	UMass Amherst, Plant Biology	Li-Jun Ma	Contribution of mitochondrial targeted proteins (MTPs) in the recent outbreak of Fusarium wilt of banana
6 Chatterjee	Archita	UMass Amherst, Plant Biology	Madelaine Bartlett	Understanding the Evolution and Development of Twisted and Geniculate Awns in Plants
7 Chilufya	Jedaidah	UMass Amherst, Plant Biology	Dong Wang	Using an Online Format to Increase Student Participation in Plant Biology Research
8 Deneve	Amber	UMass Amherst, Plant Biology	Madelaine Bartlett	Using computer vision to explore floral development and evolution in the setaria ramosa3 mutant
9 Ertle	John	PP Systems		Field assessments of A vs. Ci curves at a local Massachusetts farm: Differences in species and cultivar responses to far-red light
10 Eshenour	Kathryn	Boyce Thompson Institute, Cornell University	David Stern	Enhancing Maize Photosynthesis through Overexpression of Rubisco Assembly Factors and Subunits
11 Fallon	Michael	Williams College Department of Biology	Cynthia Holland	Functional characterization of grape methyltransferases in volatile synthesis
12 French	Allen	UMass Amherst, Department of Microbiology	Ana Caicedo	Isolating and Assessing Seed Endophytic Microbes from Weedy vs. Cultivated (Oryza sativa) Rice for their Potential Plant Growth Promoting Roles
13 Gray	Antonia	UMass Amherst, Plant Biology	Michelle Facette	A tale of two proteins: Analysis of a grass RLK and its co-orthologs in Arabidopsis
14 Gregory	Greg	UMass Amherst, Plant Biology	Sam Hazen	Real-time imaging of CELLULOSE SYNTHASE A8 expression throughout daily environmental cycles and across development of Brachypodium distachyon
15 He	Qin	Rutgers University	Xingyun Qi	EPFL8 inhibits stomatal formation during embryogenesis

Dr. Maria Maldonado is an Assistant Professor in the Department of Plant Biology at UC Davis. Maria received her BA and MSc in Biochemistry at the University of Cambridge and moved to Rockefeller University for her PhD where she focused on chromosomal regulation in mammalian cells. After her PhD, she completed an MPhil with Bioscience Enterprise at the University of Cambridge, which focused on biotech commercialization, followed by an accomplished career in life science consulting and financial industries. In 2017 she undertook postdoctoral studies in mitochondrial respiratory complexes and super complexes of mung bean and Tetrahymena using biochemical and

cryoEM approaches. In 2022 she transitioned into her faculty position at UC Davis where the Maldonado lab focuses on understanding the complex respiratory chains of photosynthetic organisms using structural biology, biophysical and biochemical approaches. Maria is a recipient of UC Davis Global Affairs Jump Start Award and a scholar for the Advancement of Multicultural Perspectives in Science.

Dr. Dan Sloan is an Associate Professor in the Department of Biology at Colorado State University where he joined the faculty in 2019 after Ph.D. and postdoctoral studies at the University of Virginia and Yale. His research focuses on molecular evolution, especially with respect to mitochondrial and plastid genome evolution supported by funding from both the NSF and NIH. Dan leads a robust and diverse research program from mechanistic molecular studies to phylogenetic and ecological analyses, including investigations of cytonuclear interactions, mechanisms of mitochondrial mutation and DNA damage, and intercellular gene transfer. In addition to receiving

national and international fellowships and scholarships during his career, as a faculty member, Dan has been recognized by awards for outstanding teaching and mentoring, including a Faculty Excellence in Undergraduate Mentoring Award (2017) and a Graduate Teaching and Mentoring Award (2023) from his department, as well as an Early Career Faculty Excellence in Teaching and Mentoring Award from the CSU College of Natural Sciences. CSU has also recognized his work with the Provost Award for Faculty Excellence. Dan has been serving as an Associate Editor for Genome Biology and Evolution since 2014.

Dr. Krishna K. Niyogi is a Distinguished Professor and HHMI Investigator in the Department of Plant and Microbial Biology at the University of California, Berkeley. Kris's research focuses on how photosynthetic energy conversion works, how it is regulated, and how it might be improved to help meet the world's needs for food, fuel, and carbon sequestration to fight climate change. He received a B.A. in biology from The Johns Hopkins University, an M.Phil. in biochemistry from the University of Cambridge, and a Ph.D. in biology from MIT. Kris is widely recognized for pioneering genetic analysis of

nonphotochemical quenching (NPQ) mechanisms that regulate light harvesting in photosynthesis. Current areas of interest include the biosynthesis and function of photosynthetic pigments, assembly of photosynthetic reaction centers, structure and dynamics of the

photosynthetic membrane, mechanisms involved in sensing excess light, and regulation of photosynthetic light harvesting. By comparing photosynthesis in diverse organisms, they aim to uncover general design principles of photosynthesis as well as adaptations to different environments. Kris received a Presidential Early Career Award for Scientists and Engineers, a Searle Scholar Award, the Melvin Calvin Award from the International Society of Photosynthesis Research, and the Charles Albert Shull Award from the American Society of Plant Biologists (ASPB). He is a Fellow of ASPB and a member of the National Academy of Sciences.

Dr. Jeeyon Jeong is an Associate Professor in the Department of Biology and Program in Biochemistry and Biophysics at Amherst College. She studies iron transport in Arabidopsis. Jeeyon received her undergraduate and Masters degrees in Korea, studying heavy metal transporters. She received her Ph.D. training investigating iron transport in Mary Lou Guerinot's laboratory at Dartmouth College. After postdoctoral work studying zinc transport in mammalian cells and yeast at the University of Wisconsin, Madison, Jeeyon joined the faculty at Amherst College in 2015 as an Assistant Professor and started her

research program to understand molecular mechanisms that regulate iron homeostasis in Arabidopsis. Jeeyon has mentored many undergraduates. Her lab recently discovered a dual-targeted mitochondrial/chloroplast iron exporter, Ferroportin 3, that is necessary for iron homeostasis, and she is continuing to investigate the physiological importance of this protein. Staple crops are not rich in iron, and by understanding how iron is regulated in plants, Jeeyon's goal is to contribute to developing strategies to improve plant growth, crop yields, and human nutrition.

Dr. Maureen Hanson is the Liberty Hyde Bailey Professor in the Department of Molecular Biology and Genetics at Cornell University. She completed her B.S. at Duke and Ph.D. and postdoc at Harvard. Maureen is known for her research on the nuclear and organelle control of gene expression in plant mitochondria and chloroplasts. Her discoveries include identification of a mitochondrial gene that specifies cytoplasmic male sterility and nuclear gene that restores fertility, recognizing dynamic plastid extensions that she named stromules, and many aspects of RNA editing in plant organelles. Current research encompasses both plant biology and biomedical research on the disease Myalgic Encephalomyelitis or Chronic Fatigue Syndrome

(ME/CFS). In plant biology, the lab continues efforts to understand the composition and function of the RNA editosome in chloroplasts and mitochondria and is also working to improve the efficiency of photosynthesis through engineering of the carbon-fixing enzyme Rubisco and synthesis of a chloroplast microcompartment based on cyanobacterial carboxysomes. In ME/CFS research, the work is directed toward understanding the molecular basis of symptom generation and development of a diagnostic test that will permit early identification of disease victims. Maureen is a Fellow of the American Society for Plant Biology and recipient of the Lawrence Bogorad Award for Excellence in Plant Biology from the ASPB. She is a Fellow of the American Association for the Advancement of Science, and a Member of the American Academy of Arts and Sciences and of the National Academy of Sciences.

UMASS AMHERST GENERAL LOCATION CAMPUS MAP

BUILDING INDEX

Agricultural Engineering Bldgs.	В3	KKG - Kappa Kappa Gamma	C5	Moore	B5
Agricultural Learning Center	C1	KS - Kappa Sigma	C2	Morrill Science Center	C3
Alfond	C4	PSK - Phi Sigma Kappa	D4	Mullins Center	А3
Apiary Building	D4	PKA - Pi Kappa Alpha	D5	Mullins Practice Rink	А3
Army ROTC Bldg.	B5	PKP - Pi Kappa Phi	C5	Munson	C4
Arnold	C2	SDT - Sigma Delta Tau	D5	New Africa	D4
Astronomy Bldg.	B2	SK - Sigma Kappa	D5	Newman Center	D4 D4
Athletic Fields	A4	TC - Theta Chi	D4		
Auxiliary Services Warehouse	A2	French	D3	North Residential Area	C1, C2
		Furcolo	C1	North Village Apartments	C1
Baker	D3			Northeast Residential Area	C2
Bartlett	C4	Garber Field	B4	Oak	B4
Berkshire	B5	George N. Parks Marching Band Bldg	B3-4	Observatory	D2
Berkshire Dining	B5	Goessmann	C3	Old Chapel	C4
Birch	B4	Goodell	B4	Olver Design Bldg.	D4
Blaisdell	В3	Gordon	D5	Orchard Hill Residential Area	E3
Bowditch Greenhouses	В3	Gorman	D4		
Bowditch Hall	В3	Grayson	E3	Paige	B2
Bowditch Lodge	A6	Greenough	E3	Parking Garage	B3
Bowker Auditorium (Stockbridge)	В3	Grinnell Arena	В3	Parking Office	A3
Boyden Gym	B4	Gunness Engineering	B2	Patterson	C6
Brett	D3	Hadley Equestrian Farm	A5	Photo Laboratory	В3
Brooks	D3	Haigis Mall	C4	Physical Plant	В3
Brown	D3	Hamlin	C2	Physical Sciences Bldg.	C2
Butterfield	E4		B5	Pierpont	B6
		Hampden Dining		Police	E1
Campus Center	C3	Hampshire	C5	Prince	B5
Campus Center Parking Garage	В3	Hampshire Dining	B5	PVTA Bus Garage	B2
Campus Pond	C3, C4	Hasbrouck	C3	Recreation Center	B4
Cance	B6	Hatch	В3	Renaissance Center	E1
Cashin	D1	Health Center	D3		Б1 В4
Central Heating Plant	A3	Herter	C4	Residence Hall Security (Dickinson)	
Central Residential Area	D3	Hicks Physical Education	C4	Robotics	B2
Central Stores (Physical Plant)	В3	Hillel House	D5	Robsham Visitors Center	C5
Chabad House	C5	Holdsworth	В3	Rudd Field (Soccer)	A5
Chadbourne	E4	Hotel	C3	Shade Tree Laboratory	D3
Champions Center	B4	Integrated Science Building	C3	Skinner	C3
Chancellor's House	D3	Integrative Learning Center	C3	Sortino Softball Complex	A5
Chenoweth	B3	International Programs	D4	South College	В3
Clark	D4	Intermed. Processing Fac. (IPF)	E1	Southwest Residential Area	B5
		Isenberg School of Management		Stockbridge	B3
Cold Storage Bldg.	В3	-	C4	Student Union	C3
Comm. Hon. College Residential	D.4	James	B5	Studio Arts Building	D4
Community	B4	John Adams	B5	Sycamore	B4
Communication Disorders	D5	John Q. Adams	B5	Sylvan Residential Area	D2
Computer Science Bldg.	B2	Johnson	C2		
Conte Polymer Research Center	C2	Kennedy	B5	Telecommunications Office	B6
Coolidge	B5	Knowles	B3	Tennis Courts	A4
Crabtree	C2	Knowlton	C2	Textbook Annex	В3
Crampton	B5			Thatcher	D2
Crotty Hall	D5	Leach	C2	Thompson	В3
Dickinson Hall	B4	Lederle Graduate Research Ctr.	C2	Thoreau	B5
Dickinson House	D3	Lewis	D2	Tillson Farm	E1
Draper	C3	Library, W.E.B. Du Bois	C3	Tobin	B4
Du Bois Library, W.E.B.	C3	Life Science Lab	C-D3	Toddler House	A6
		Lincoln Apartments	C5	Totman	C2
Duda	B2	Lincoln Campus Center	C3	Track & Field	A5
Durfee Conservatory & Garden	D3	Linden	B4	Transit Facility	B2
Dwight	C2	Lorden Field (Baseball)	A3		
East Experiment Station	C3	Lyon	C2	UMass Police Department	E1
Elm	B4	Machmer	В3	University Club	D3
Emerson	B5	MacKimmie	B5	University Extension	В6
Engineering Laboratory	B2	Mahar Auditorium	C4	University Health Center	D3
Engineering Laboratory 2	B2			University Press (E. Exp. Station)	C3
Farley Lodge	A6	Maple	B4	University Without Walls	A5
		Marcus	C2	Van Meter	E3
Fernald	D4	Marston	B2	Visitors Center	C5
Field	E3	Martin Jacobson Football			
Fine Arts Center	C4	Performance Center	A6	Washington	B6
Flint Laboratory	B3	Mather	E2	Webster	E3
Forest & Parks Buildings	A2	McGuirk Alumni Stadium	A6	West Experiment Station	C2
Franklin Dining	D4	McNamara	D1	Wheeler	D4
Fraternities & Sororities		Melville	B5	Whitmore Administration Bldg.	C4
ATG - Alpha Tau Gamma	C6	Memorial Hall	C4	Wilder	D3
CO - Chi Omega	E2	Middlesex	C4	Worcester Dining	C2
IGU - lota Gamma Upsilon	D5	Montague House	C1	Wysocki House	C1
